

技術ノート KGTN 2015040201

現 象

[GGH5.X] GG サーバーへの接続に失敗したが、何か役立つ情報はるか？

説 明

GGH5.X からクライアント側のログファイル（Client Log Files）機能が実装されましたので、そのログファイルを参照することで接続失敗の状況を確認することが出来ます。フォルダ `%APPDATA%\¥GraphOn¥Logs` にこのログファイルが作成され、内容のサンプルは下記の通りです。

```
Opened log for gg-client.exe process ID 3516
Local date and time: Thu Apr 02 14:35:15 2015

Version Information
  gg-client.exe: 5.0.0.21567
  cs4.dll: 5.0.0.21567
  dc4.dll: 5.0.0.21567

Windows Version 6.1.7601

System Information
  Number of processors: 1
  Processor architecture: x86

Local Time      Thread      Message
14:35:15        3672      SessionInstantiator::openConnection: host = 124.39.211.145.
14:35:15        3672      Creating the tunneling mechanism for the connection to the host.
14:35:15        3672      Created the security message courier.
14:35:15        3672      Attempting to connect to 124.39.211.145 on port 491
with options 0x3a01.
14:35:36        3672      Failed to send the following to the host for logging: Situation 11114
occurred in  Module 0x80000080, (ETIMEDOUT) Operation timed out
14:35:36        3672      Failed to send the following to the host for logging: Situation 3020
occurred in  Module 0x80000080,
Failed to connect to 124.39.211.145 on port 491.
14:35:36        3672      Failed to send the following to the host for logging: Situation 3020
occurred in Module 0x80000080, Failed to connect to 124.39.211.145
on port 491 with options 0xa01 via a proxy server.
14:35:36        3672      Situation 3020 occurred in Module 0x80000008, Stack Trace:
SessionInstantiator::openConnection ()
14:35:42        3672      Closing client log file.
